DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Pan et al. (6,499,951). Pan et al. discloses a fan assembly comprising: a base portion having a fixed non-oscillation base; a blower portion 30 that includes a oscillation blower mount 15 that is operably coupled to the base and a blower 3 that is coupled to the blower mount and which oscillates when the blower mount oscillates; a blower mount oscillation gear 10 fixed to the blower mount; and a oscillation motor 12 having an oscillation motor gear that engages the blower mount oscillation gear. The blower mount and the base define an accommodation space therebetween with the oscillation motor and the blower mount oscillation gear housed inside the space (figure 9).

CONCLUSION

Allowable Subject Matter

Claims 1-16, 19 and 20 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Claims 1-16, 19 and 20 recite the limitation of degree of oscillation sensors in the blower mount that define the degree of oscillation experienced by the blower mount. Further, powers sensors

are recited to correspond with the oscillation sensors but normally do not engage said sensors until the direction of oscillation is to be reversed. None of the prior art of record teaches or discloses having both sensors in the blower mount.
